

SPOTIFY DESIGN SYSTEM

WEBSITE

My Roles	Visual Designer, UX Designer
Roles (team)	Project Manager, UX/UI Designers, Web Developer
Stack	Figma, Illustrator, webpack, SCSS, JavaScript, gsap, Jquery, Isotope.js
Live website	https://spotify.pamavoc.com/

Elevator pitch

It's a website which concentrates every components, assets, animations and guidelines from Spotify application for every platforms.

User Needs

- Select another platform
- See the layout of each platform
- See all icons
- See all illustrations from Spotify
- See all components for each platform
- See the size, typo and colors used in the components
- Have the perfect dimensions of the components
- See Spotify guidelines for better design
- See application guidelines: why something is placed here (we can invent).
- View the assets and components of the web version of Spotify

Client Needs

- Have a clean layout to display all the information (for each page).
- Have smooth transitions when switching from one section to another.
- Make sure that all assets and new assets collaborate with each other.
- Have a fun approach to design systems, we are here to create a doc so it must be professional but at the same time it must have fun interactions like horizontal scrolling for example.
- The components must be classified.

Content & fonctionnalities

Content requirements

the user will be looking for :

- a list of all platforms where the application is available
- components for each platform with their size and descriptions
- all the advantages of the application (icons, illustrations ...)
- all the animations of the application
- application templates and layout (indications)

Functionnalities requirements

the user will be able to :

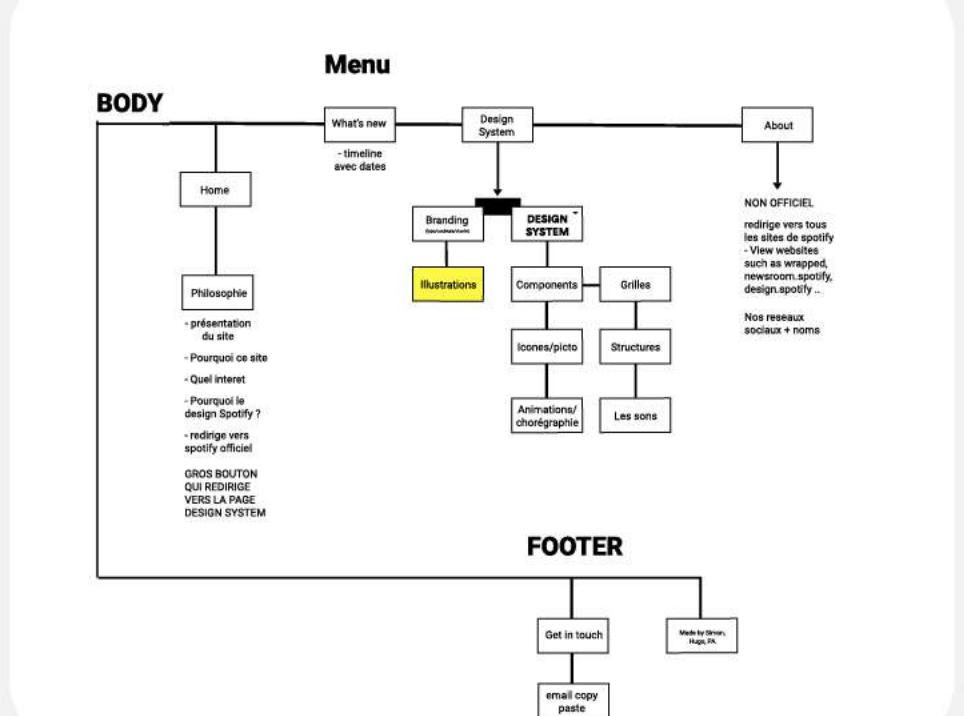

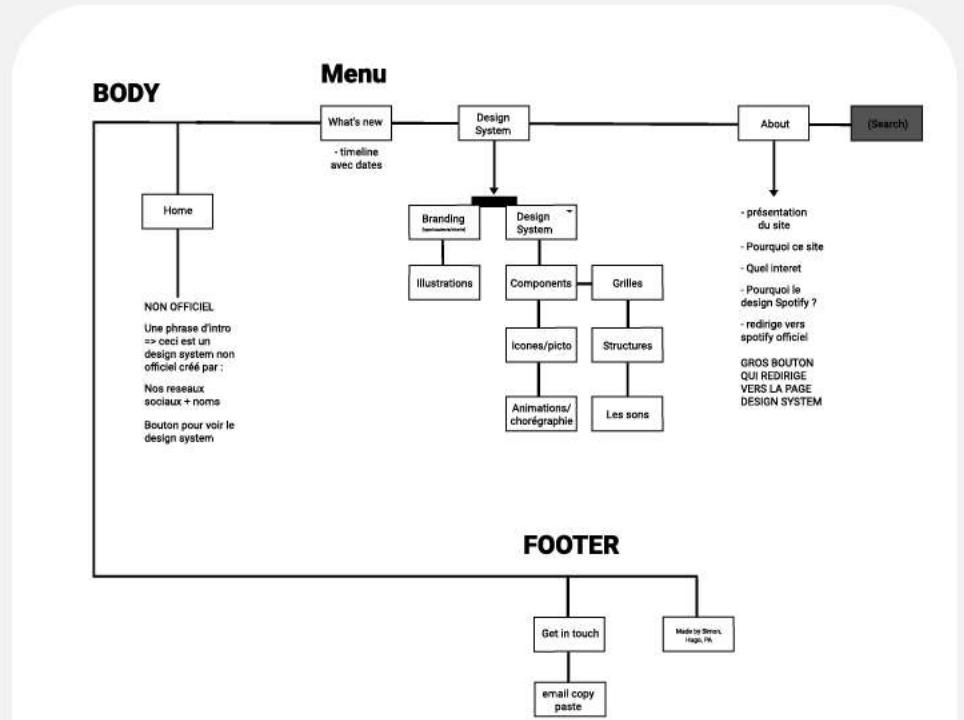

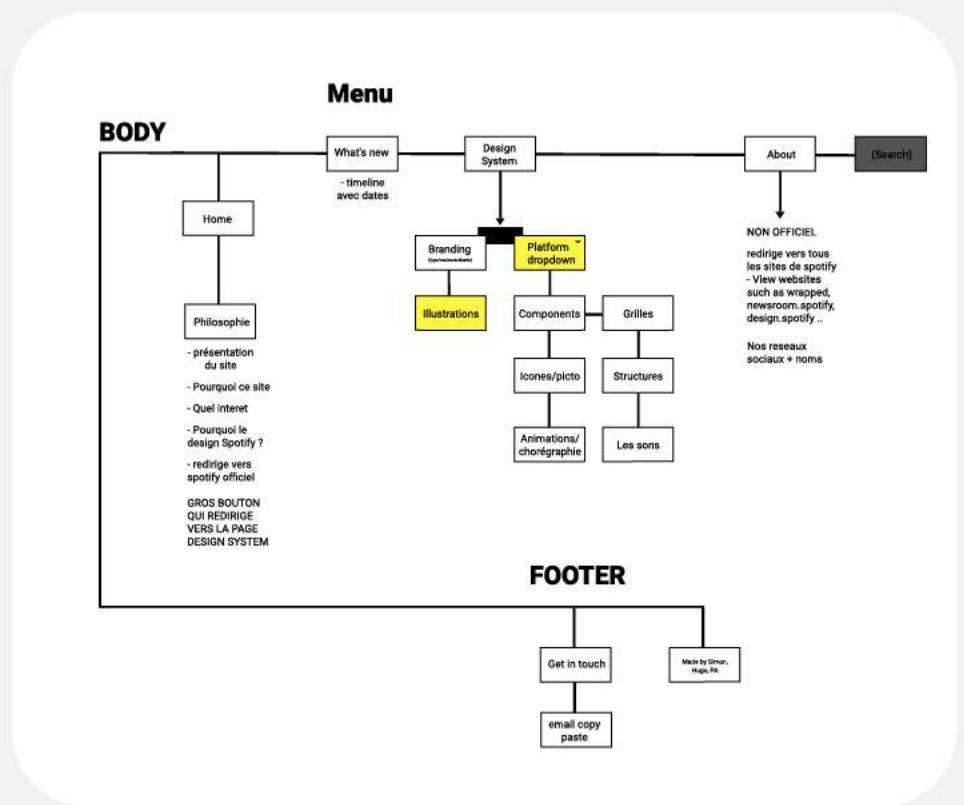

- navigate freely with smooth transitions from one page to another
- see each component for each platform with details.
- download the application
- go to other spotify resources (spotify for developers, spotify design)

Unofficial but cool!

Why did we build this?

It all started with a group project for the end of our first year.

@Gobelin

Why Spotify Did We Build This?

We thought it was great for people, who like to design & to code to have this public library, in order to understand a brand and his application

What about copyright ?

We thought it was great for people, who like to design & to code to have this public library, in order to understand a brand and his application

sign System?

What about copyright ?

Except our original creations of interfaces, assets, icons, illustrations. Everything belongs to Spotify and if we are asked to take the website down, we will. No money is made whatsoever.

That's all folks!

Visual Mockups

Home page

The image shows two versions of the Spotify Design System home page side-by-side. Both pages have a dark blue header with the Spotify logo and 'Spotify Design' text. The left version has a light blue background with a large red flower graphic. It features sections for 'Why did we build it?', 'What about copy?', and 'Spotify use of colors for his logo.' The right version has a black background with a large orange flower graphic. It features sections for 'Why did we built it?', 'What about copyright?', and 'Logo - standard use cases'. Both pages include a 'DESIGN SYSTEM' button at the bottom.

Design System Panel

A screenshot of the Spotify Design System panel. At the top, there are tabs for 'Philosophy', 'Assets', and 'Branding'. The 'Assets' tab is selected. Below the tabs, there are two columns of circular icons. The left column is labeled 'Platforms' and includes icons for Desktop, Mobile, and Show all. The right column is labeled 'Title de l'asset - ses plateformes' and includes icons for size/color and guidelines. There is also some descriptive text in French.

Branding page

The image shows two versions of the Spotify Design System branding page side-by-side. Both pages have a dark blue header with the Spotify logo and 'Spotify Design' text. The left version has a dark blue background and features sections for 'Circular', 'Proxima Nova', 'Desktop' (with 'Title 1' and 'Title 2' examples), 'Mobile' (with 'Title 1', 'Title 2', and 'Corps 1' examples), 'Primary Colors' (with a color palette), 'Others Colors' (with a grid of small colored squares), 'Logo - standard use cases' (with several Spotify logo variations), and 'Spotify use of colors for his logo.' (with a grid of many different colored Spotify logos). The right version has a green background and follows a similar structure, including sections for 'Circular', 'Proxima Nova', 'Desktop' (with 'Title 1' and 'Title 2' examples), 'Mobile' (with 'Title 1', 'Title 2', and 'Corps 1' examples), 'Primary Colors' (with a color palette), 'Others Colors' (with a grid of small colored squares), 'Logo - standard use cases' (with several Spotify logo variations), and 'Spotify use of colors for his logo.' (with a grid of many different colored Spotify logos). Both pages include a 'DESIGN SYSTEM' button at the bottom.
